About

EstoGel® Green is a new oil gelling agent, 100% natural origin and COSMOS approved.

EstoGel® Green is a rheology modifier with suspensive and rheofludifying properties that allows to create non brittle, transparent and sprayable gels with a very pleasant sensory touch. The versatility of EstoGel® Green allows the development of various galenics (anhydrous formulas, emulsions, sticks...) for a multitude of applications.

EstoGel® Green process: introduce the EstoGel® Green in the oil phase at 80°C.

EstoGel® Green meets the needs of cosmetic formulators for biosourced ingredients that can replace petroleum-based viscosifiers. EstoGel® Green, combines naturalness and performance to meet the challenges of tomorrow.

Features and benefits

• Rheology modifier

- -Oil thickening agent
- -Forms clear oily gels
- -Creates innovative textures

Shear-thinner

- -Sprayable
- -Pumpable
- -Easy spreading

Suspension

- -Suspension ability from 1%
- -Suspensive ability of particles: pigments, glitters, mineral filters
- -Suspension of droplets in W/O emulsion
- -Stabilizes emulsion

Sensory

- -Short-chain polymer
- -Low molecular weight
- -Light and neutral touch

Other benefits

- -Easy to disperse
- -Controls waxes crystallization
- -Improves pigment distribution
