2. Heat up to 80°C under stirring
3. At 80°C, stir for 20 minutes until the blend is perfectly homogeneous
4. Cool down to 65°C under stirring
5. Introduce the silica and homogenize
6. Introduce the menthol and homogenize
7. Introduce the essential oils and homogenise
8. Pour into a suitable packaging

Rituel du Tigre

The association of EstoGel[®]Green with 100% natural waxes and oils allows to obtain a texture that imitates petroleum jelly and allows to create a texture equivalent to the original balm without using petroleum-based materials. EstoGel[®]Green gives consistency to the product without compromising on the massage thanks to its rheological properties. At the end of application, it leaves a light film on the skin to extend the action of the balm.

Directions for use : take a small amount with your fingers and warm it up between your hands. Apply on the painful zones by massaging firmly. Wash your hands after use.

D	HE EUCALYPTUS			1,25
D	HE LAVANDER			1,25

1. Introduce the ingredients of the PHASE A in a vessel
2. Heat up to 80°C under stirring
3. At 80°C, stir for 20 minutes until the blend is perfectly homogeneous
4. Cool down to 60°C under stirring
5. Introduce the menthol and wait until it is perfectly solubilised
6. Cool down to 35°C under stirring
7. Introduce the essential oils and homogenize
8. Pour into a suitable packaging

Rituel Ayurvedique

This roll-on treatment combines EstoGel®Green, which gels the oils transparently, with castor oil and essential oils to create a complete treatment. The galenic design makes it possible to obtain a transparent and easy-to-apply ritual by sliding the ball onto the skin. Thus, the application is precise for a targeted care and its format makes it possible to bring freshness thanks to the joint action of the ball and menthol. The film-forming properties of EstoGel®Green extend the benefits of this ritual for deep soothing.

By gelling this oil of massage, EstoGel®Green makes it possible to texture the oily complex while avoiding a loss of the product through a fast delivery.

Rituel d'Orient

Discover in this oriental ritual, a milky oil combining EstoGel®Green and a complex of oils to provide an elegant texture to coat the hair and distribute evenly the precious Argan oil on the hair.

The technology of EstoGel®Green allows in this hair ritual to seal open cuticles, repair split ends, smooth hair fibers but also enhance the shine and provide a lasting and perceptible repair to the touch.

Let yourself be carried away by the notes of orange blossom and amber vanilla for a trip to the heart of the Medina and enjoy a reminiscent touch of the sweetness of the Orient.

Directions for use : Put a few drops of this exlir in your hands and apply on the hair, insisting on the ends.

1. Solubilise spirulina in water
2. Wet the sugar with the spirulina solution and mix
3. Introduce the ingredients of the Phase C in a beaker and heat up to 80°C under stirring
4. At 80°C, stir for 20 minutes until the blend is perfectly homogeneous
5. Cool down under stirring
6. Introduce the essential oil around 35°C and homogenize
7. Blend together the balm and the sugar

Rituel Marin

This ritual combines the benefits of spirulina and aloe vera in a fresh exfoliating scrub. Aloe Vera provides moisturizing, healing and softening properties. It repairs the epidermis and protects it from the micro-aggressions that the skin undergoes daily. Used in association with spirulina, this exfoliant revitalizes the skin thanks to the grains of sugar (or salt). Finally, the green color of this care is naturally obtained by the presence of spirulina. This one allows to correct the imperfections of the complexion without coloring the skin. The EstoGel[®]Green comes here to bind the ingredients in a balm easy to pick up.

Directions for use: Sugar scrub - take a small amount and massage the lips for exfoliation. Salt scrub - apply a small amount to the face and massage gently, avoiding the eye area. Rinse your skin after use.

Rituel de la Reine de Saba

PHASE	TRADE NAME	INCI NAME	SUPPLIER	%
A	DEMINERALISED WATER	Water		68,30

1. Introduce the ingredients of the PHASE A in the main vessel
2. Prepare a premix of xanthan gum and glycerin and add the PHASE B into the PHASE A under stirring
3. Heat up the PHASE A+B at 80°C under stirring
4. Introduce the ingredients of the PHASE C in a secondary beaker
5. Heat up the PHASE C to 80°C under stirring
6. At 80°C, stir for 20 minutes until the blend is perfectly homogeneous
7. Make the emulsion adding PHASE C to PHASE A+B and stir vigorously for 15 minutes
8. Cool to 35°C under stirring
9. Introduce the fragrance and homogenize
10. Pour into a suitable packaging

Rituel de la Reine de Saba

Thanks to the combination of Shea butter and Moringa oil, key ingredients of African beauty, this richly gentle treatment nourishes your skin without making it greasy, while strengthening it. Like the Queen of Sheba, this treatment combines power and softness in a dense and enveloping texture.

The use of EstoGel[®]Green in this formula stabilizes the emulsion and gives it a filmogenic effect. The skin is covered with a protective satin veil to allow a hydration throughout the day. EstoGel[®]Green is your new weapon to reinforce the stability of your emulsions while bringing comfort to the application.

Directions for use : Take in the hand a small amount of cream and apply it in a uniform way on the face by massaging gently for an optimal penetration.
