

# Soothing Face Cream

## Benefits

Comparison with and without EstoGel®:  
The texture with EstoGel® is thicker and creamier,  
but not greasier!  
Bonus: the polymer helps stabilize the gel-cream.

PHASE	RAW MATERIAL	%
A	Demineralized Water	71,20
A	Euxyl® PE 90 10	1,00
B	Glycerin	3,00
B	Xanthan Gum	0,20
C	EstoGel® Green	1,20
C	Coco-Caprylate Caprate	13,80
C	Dicaprylyl Ether	4,00
D	Montanov™ 202	3,00
E	Fragrance	0,40
E	Gatuline® Skin-Repair AF	2,00
E	Tocopheryl Acetate	0,20

## Process

- Introduce A in the main beaker
- Premix the ingredients of B and add them to A under stirring
- Heat up A+B to 80°C under stirring
- Introduce C in a secondary beaker, heat up to 80°C under stirring and at 80°C, stir for 20 minutes
- Add D to C and homogenize
- Make the emulsion pouring C+D on A+B and homogenize for 15 minutes
- Cool down to 60°C, add E and homogenize
- Cool to 40°C, add F and homogenize
- Cool to 35°C and pour into a suitable packaging
